

How Blockchain will work in the Recorder's office

How will we accept payment for the vital record request? Exactly the same as we do currently. There is no change to the payment of the record being requested.

How will Blockchain work in the Recorder's office? When the request is received, the Recorder would open up the software application, drag the certificate into the application, and electronically apply the digital seal certifying it as a true and correct copy of the original on record. See example:

Ethereum ID: 0xa9557c17a9eace5b06c5c7e11e0d6bdc51e252c

Will the Recorder still be the repository of our documents or will it be on the Blockchain?

Recorder maintains control of the documents. The seal placed on the document is used for verification of the certificate.

Can you print the certificate? Yes, you can print the certificate however it is not recommended. The intent of using the Blockchain is to forward the email with the seal embedded to the agency requesting the certificate.

Can you forward the email? Yes, the email contains the instructions and the attachment which is the electronic certificate and can be emailed as many times as necessary.

How much does it cost? It varies with the number of stamps you would purchase, from \$1.80 to \$2.50 (according one vendor). Washoe County Nevada offers the electronic certificate at no additional fee. Cost of the electronic certificate is offset by the mailing and banknote paper cost.
